Collision Prevention Service for Emergency Response Vehicles

When Responders are on-scene and on the move, HAAS Alert **R2V (Responder-to-Vehicle)** technology delivers advanced notification to motorists and vehicles, clearing the way for safer, faster emergency response.

Measure Performance

Real-time dashboard on any device with a web browser

- Number of drivers/vehicles alerted
- Statistics: total incidents, runs, time-to-scene, time-on-scene
- Vehicle location/status (e.g., "responding," "on-scene")

Reduce Response Time
Motorists approaching responding emergency vehicles en-route are alerted in advance.

Avoid Collisions
Motorists approaching responding emergency vehicles at intersections are alerted in advance.

Safety On-scene
Motorists approaching responding emergency vehicles on-scene are alerted in advance.
