What We Do

We secure, optimize, and accelerate mission-critical apps and resources for highly mobile organizations.

We also deliver highly detailed visibility into field-related and end-user behavior issues, even on networks IT doesn't own.

The Absolute Secure Access Platform

Absolute offers one platform for security, visibility, and control differentiated on user experiences for mobile and hybrid workforces.

ABSOLUTE

What We Deliver

Persistent, Resilient Connectivity

Absolute provides a complete secure access solution purpose-built to keep mobile workforces productive regardless of their location.

- **Unbreakable** connection using tunnel and session persistence
- Resilient, self-healing infrastructure for exceptional performance and reliability
- Tamper-proof Windows client

Deep Visibility & Analytics

IT gains exceptional visibility into user and network behavior inside and outside the corporate perimeter – even for networks you don't own.

- Diagnostics on device and network to empower help desk teams
- Rich analytics on network performance – from cellular to public Wi-Fi
- Near real-time geolocation dashboards
- Reputation and categorization of domains visited by remote workers

Actively Improved Worker Experiences

Enhances the near real-time experiences of remote workers: no more unreliable connectivity or crashing applications.

- Video and audio optimizations
- Optimized web traffic even in challenging conditions
- Broad OS support (Windows, macOS, iOS, and Android)

Return on Investment

2 Hours

per week of productive time is currently lost per employee due to mobile interruptions
Get those productive hours back with Absolute

\$25 million

is the average cost of mobile technology interruptions at the average 10,000 person company
Achieve those savings with Absolute

55%

of all helpdesk tickets today are related to mobile devices
Reduce those tickets with Absolute

\$4.45 million

was the average cost of a corporate data breach in 2023
Don't risk your business' hard-earned dollars

Questions to Ask

- ✓ Do your mobile workers complain about connectivity issues or a slow experience in the field?
- ✓ Do you hear of application performance issues or drops due to changes in network conditions?
- ✓ Is it difficult to diagnose issues in the field when someone calls in?
- ✓ Do you have cellular overages because of device misuse?

Address these issues with Absolute Secure Access.
