

FLEET COMPLETE[®]

Reliable telematics solution for utility fleets

Fleet Complete provides an integrated telematics solution that uses multi-sensor in-vehicle system to capture and log actions in the field, such as driver behavior on the road, locating and dispatching the closest unit, the time it took to arrive onsite, use of vehicle's auxiliary equipment, and more.

Fleet Complete offers a custom, highly integrated fleet management solution that enables fleet managers and dispatchers to have access to such field intelligence as status of each driver, their vehicle, their location, equipment integrity, behavior on the roads, routing information, vehicle inspection and more, allowing them to make smart on-demand decisions and improve fleet safety and efficiency.

- Track and manage your mission-critical fleet and workforce in near real-time
- Monitor and minimize aggressive driver behavior on the roads and help lower fleet running costs
- Get insight into the status of your vehicles by monitoring Engine Control Module for check engine and Diagnostic Trouble Codes*
- Schedule and track completion status of work orders and tasks
- Prolong vehicle health and lifetime with automated maintenance management module
- Capture regular inspections and log defects of on-board equipment
- Report on accurate sensor use activity and track the hours auxiliary power take-off equipment was in use
- Keep an accurate chronology log of the activity taken during the dispatch call

Fleet Tracker MGS800:
Captures vehicle location, engine hours, fuel consumption and data from additional sensors

Front/back door and stop sensors:
Logs the time and location the door is opened and closed

PTO sensor:
Captures the time and location when the power take-off auxiliary equipment is engaged

Equipment trackers:
Notifies if any portable equipment is left behind, or has been dropped during transportation

Task Tracker:
Ability to dispatch simple tasks or orders directly to the technician's mobile device

Bi-directional camera:
Monitors and records GPS and time-stamped instances of aggressive driving behavior

Driver Vehicle Inspection Report:
Helps streamline Pre/Post-Trip inspections and logs reports for audits

Enhanced Push-to-Talk:
Instant communication with multiple drivers in the field from one screen

MORE THAN JUST FLEET TRACKING

Powered by GPS technology, the Fleet Tracker solution provides you with near real-time visibility over your fleet location and vehicle diagnostics data. The Fleet Complete system turns this data into actionable business intelligence that will help you make smart decisions and efficiently manage your fleet.

Feature-rich and versatile Fleet Tracker integrates with your vehicle's Engine Control Module* providing your fleet managers with detailed vehicle status by reporting on 19 different engine data points such as oil level, engine temperature and more.

EQUIPMENT INTEGRITY CONFIDENCE

Asset Tracker 1 is one of the world's smallest trackers with built-in environmental and motion sensors that capture and alert of a change in asset's surrounding conditions, such as temperature, humidity, light exposure, impact, movement and location, allowing technicians to operate their equipment in confidence having the historic log of equipment's storage and transportation conditions.

DIGITIZED VEHICLE INSPECTIONS AND DEFECT MANAGEMENT

Inspect by Fleet Complete is an automated DVIR solution designed to streamline accuracy and efficiency of pre/post-trip inspections and defect management.

Drivers must complete a predefined checklist, log defects and sign off on the report. Defects are logged in the Mechanic's Portal and prompt reminders for service to the driver and the mechanic, ensuring all vehicles are fully operational and safe for the road.

INSTANT COMMUNICATION WITH FIELD STAFF

Complimentary integration with an existing Enhanced Push-to-Talk solution provides an add-on communication channel as backup. Dispatchers can conference with multiple units in the field from one screen.

DRIVER BEHAVIOR COACHING WITH VIDEO TELEMATICS

Fleet Complete Vision is a dashcam telematics solution that captures exceptions in driving behavior, such as lane departures, speeding, tail gating and more, and provides recorded proof of what happened on the road to help standardize driver training and coaching.

SUITED TO YOUR NEEDS

Fleet Complete solution's key features, such as tracking, vehicle diagnostics, sensor monitoring, rules and reporting, as well as customer service, such as unlimited training and support, are included at no extra cost offering you the best-in-class service.
