Subscriber Paid Reverification

The FirstNet Subscriber Paid Program gives individual users the ability to acquire and manage their own access to the FirstNet nationwide, high-speed wireless broadband network and its innovative tools and technologies specifically built for public safety.

To safeguard access to this vital network, Subscriber Paid users must periodically reverify their FirstNet eligibility.

Eligibility requirements for Subscriber Paid users

To remain eligible for the FirstNet Subscriber Paid program, a user must meet all the following requirements:

- Be a current employee or an active volunteer with an eligible organization.
- Be in a FirstNet-eligible job title or function.
  - » Visit Firstnet.com/help for more details.
- Provide an approved document proving eligibility, if required.

Reverification timeline

If notified, Self-Verified Subscriber paid users have 30 days from their reverification notification to submit a reverification document. Failure to successfully reverify within that period will result in the user being moved to the offboarding program.

Migration to Agency Verified Subscriber Paid service

If your organization adopts an Agency Verified Subscriber Paid Program, you can work with the Agency Verified administrator to transfer to the organization's Agency Verified Program.
