¹Data throughput speeds are capped at a maximum available data speed, which may not provide the highest speed available at your location at a specific point in time. **Each plan's "up to" data speed is not guaranteed to be your actual speed;** actual speeds vary and may be affected by several factors, including your proximity to a cell site, the capacity of the cell site, the number of other users connected to the same cell site, the surrounding terrain, AT&T network management practices, the applications you use, and your in-building coverage.

²Plans are not intended as a substitute for consumer Internet services. Plans may not be used to access entertainment and other non-business websites that offer video or audio streaming services and may not be used for audio streaming, web hosting, or public or guest Wi-Fi.

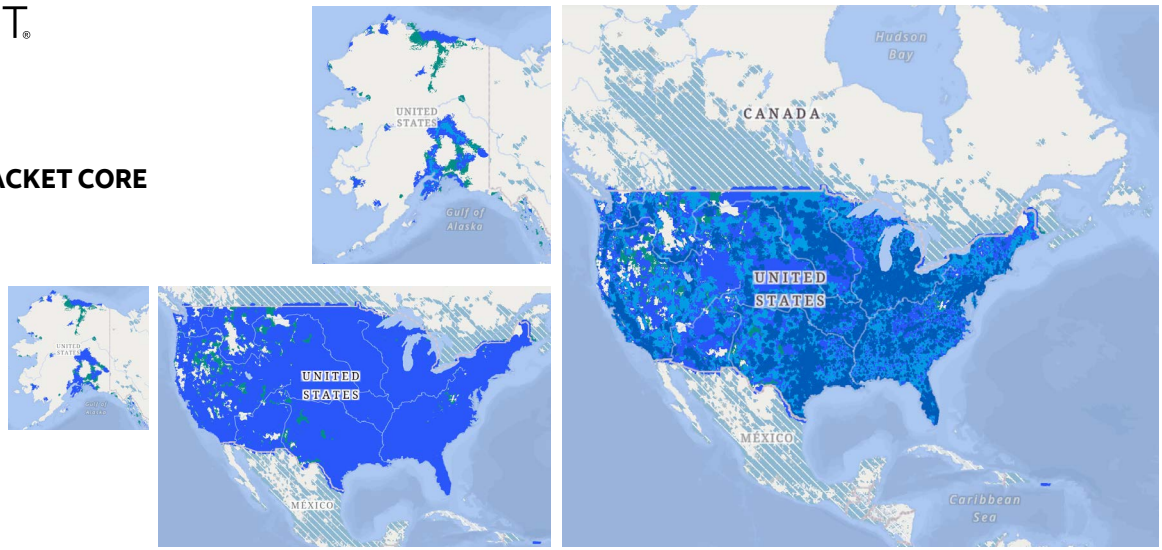

³There are no overage charges; **if data usage on a line exceeds 175GB for three consecutive monthly billing periods, AT&T may move the line to a FirstNet Mobile - Pooled plan for data-only devices (see firstnet.com/firstnetprimary)** and charge you the corresponding monthly amounts.

⁴Data throughput speeds of up to 50 Mbps and up to 100 Mbps require a wireless router with a Category 18 or higher modem and must be used where enhanced AT&T 4G LTE-Advanced service or FirstNet 5G/5G+ service is available.
